Kill your exam at first Attempt

**CompTIA**

# 220-802

*CompTIA A+ Certification*

**Answer:** D

**QUESTION:** 336

The IT security group has configured a new server to be the secure gateway for all company Internet traffic and disabled the ability for users to communicate directly to the Internet. Which of the following **MUST** be configured on the user's workstations to restore users' ability to communicate to the Internet?

- A. DHCP settings
- B. Browser security settings
- C. Proxy settings
- D. NETBIOS network settings

**Answer:** C

**QUESTION:** 337

A server administrator, Anne, has set up a new server on the company's network to provide centralized user and access management. The file permissions on the server have been shared over the network based on user groups divided into departments and do not have administrative rights. This practice is called which of the following?

- A. Logical separation of data
- B. User segregation
- C. Administrative overhead
- D. Principle of least privilege

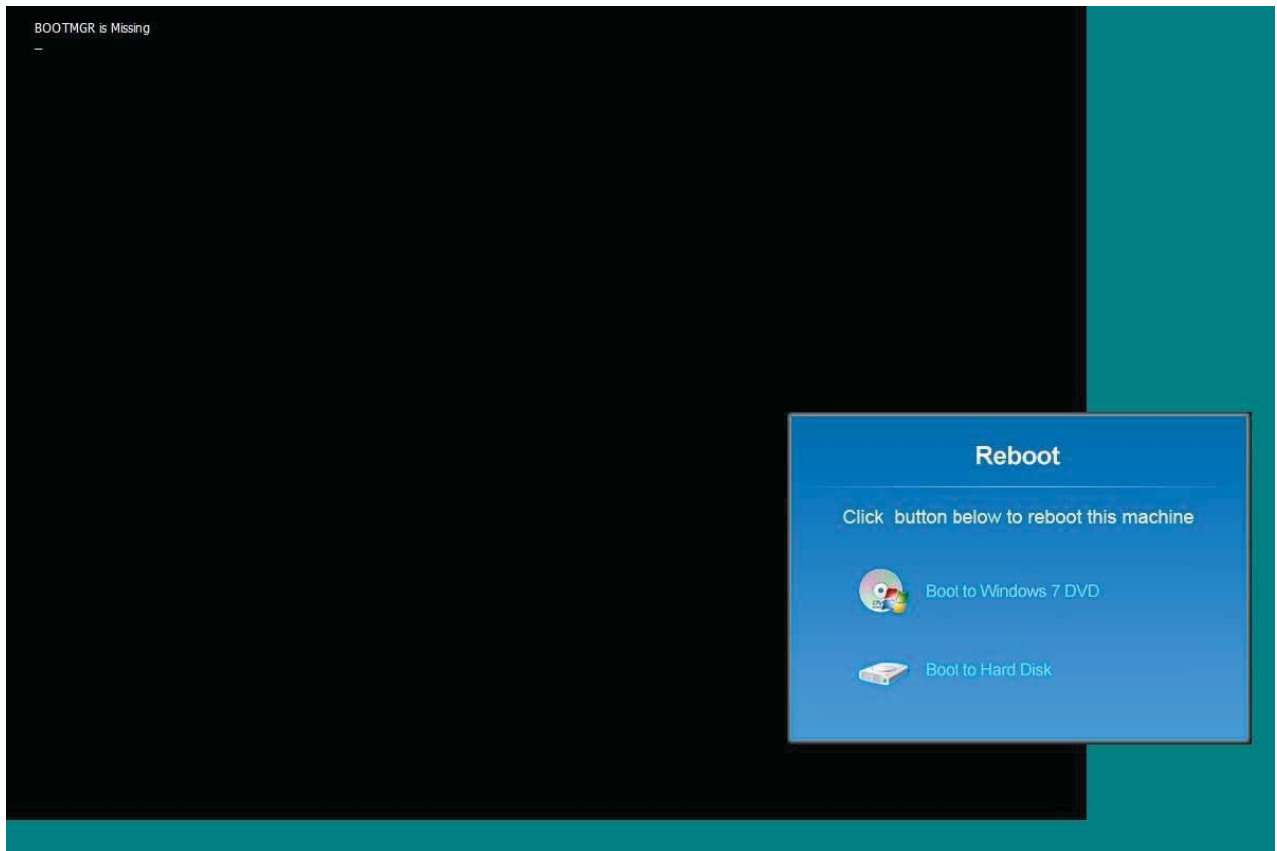

**Answer:** D

**QUESTION:** 338

A Windows 7 machine appears to have a failure. Every time it is rebooted, the message "BOOTMGR is missing" appears. You have previously inserted a Windows 7 installation DVD into the DVD-ROM. Please repair this failure without overwriting the customers' local user profiles.

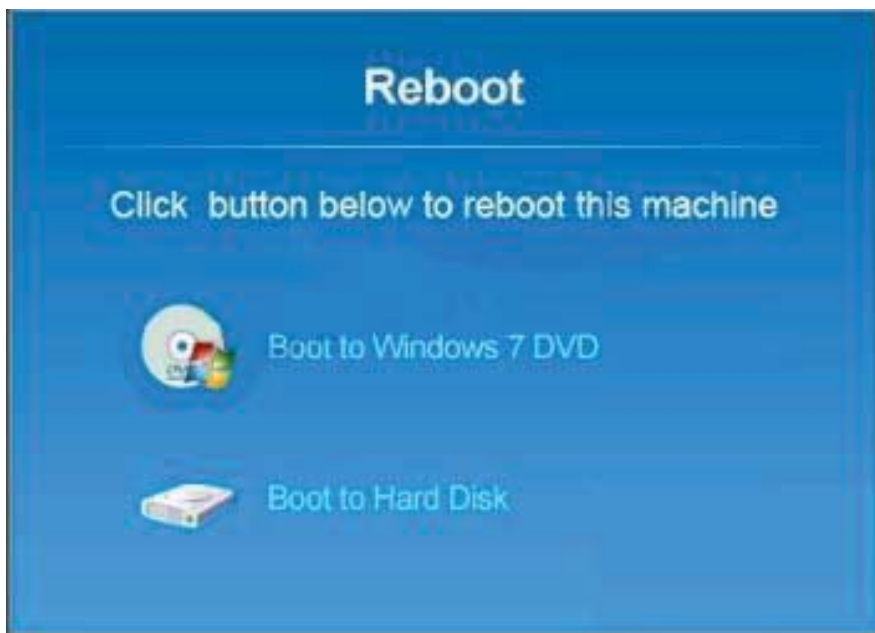

Instructions:

- Launch the simulation to repair the failure
- Type Help in command line to show list of available commands
- When you have completed the simulation, please select the done button.

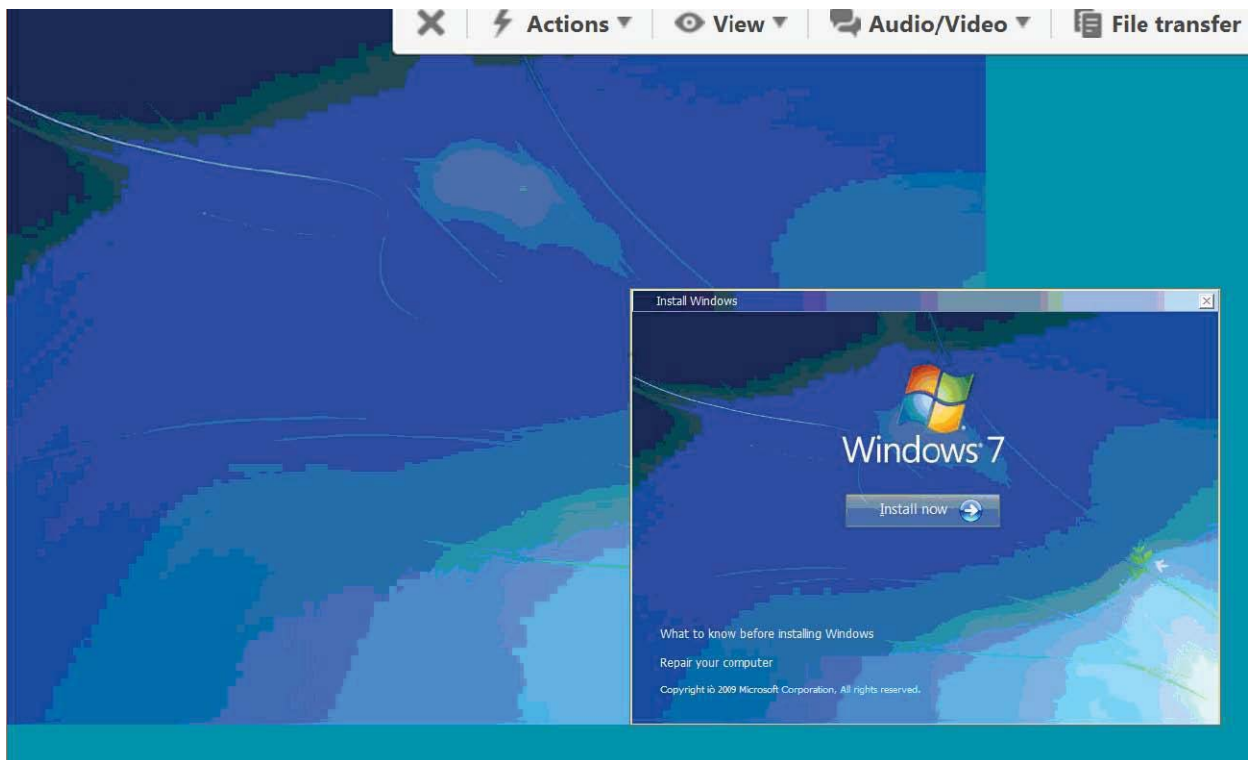

**Answer:**

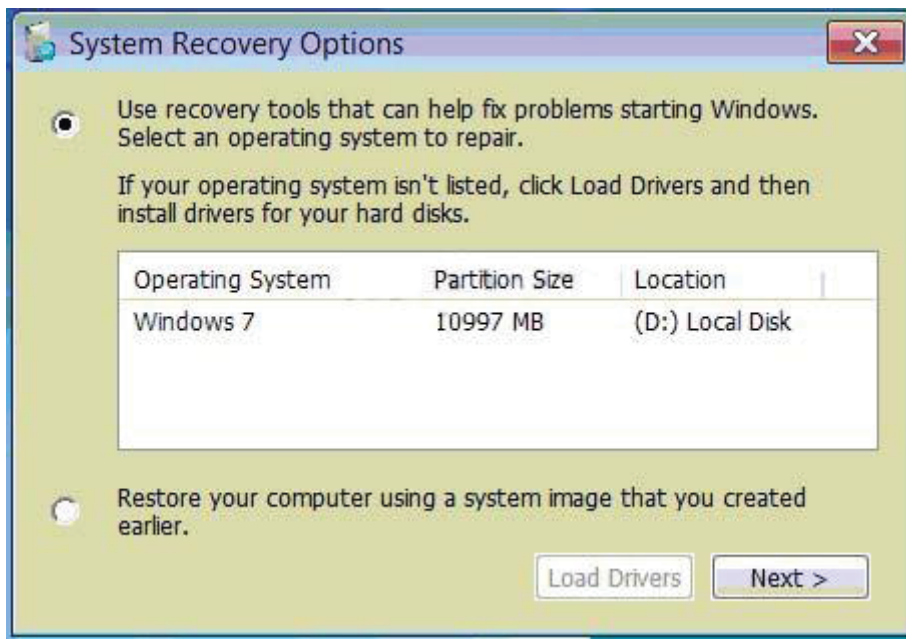

1. Boot using Windows 7 DVD:

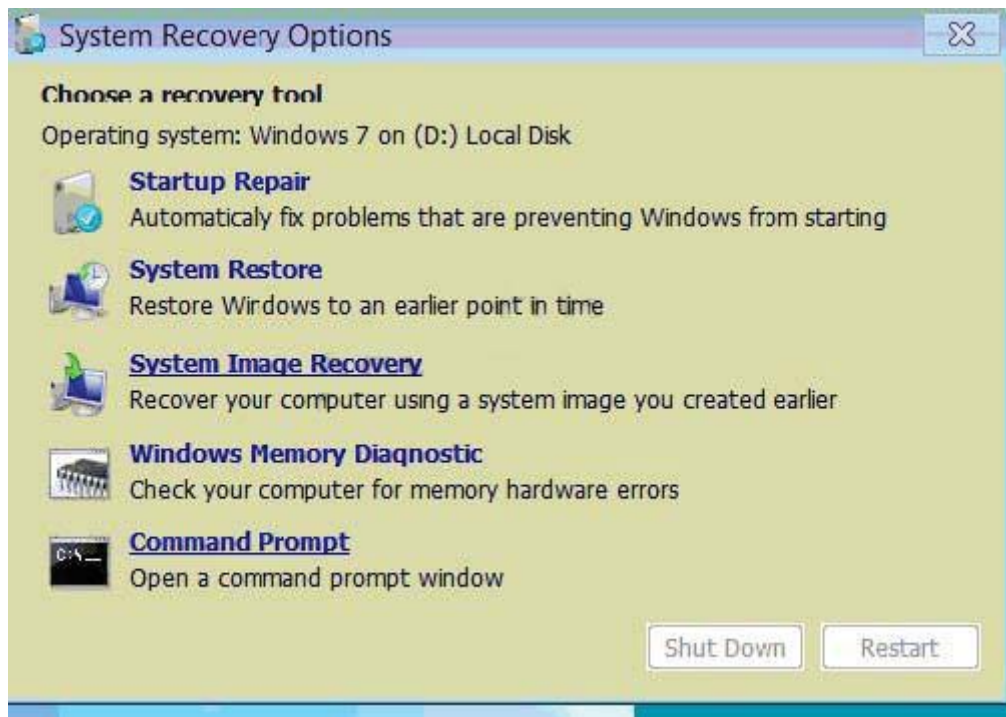

2. Select “Repair your computer”

3. Select recovery tools

4. Chose command prompt

5. Use the command bootrec/fixboot

```
Microsoft Windows [Version 6.1.7600]

X:\Sources>bootrec /fixboot
The operation completed successfully.

X:\Sources>_
```

**QUESTION: 339**

You have been tasked with setting up a new executive's laptop on his home network. After an investigation, you find that his home network is wired and has the following settings:

- IP range is 10.10.10.0
- Netmask is 255.255.255.0
- Default gateway is 10.10.10.1

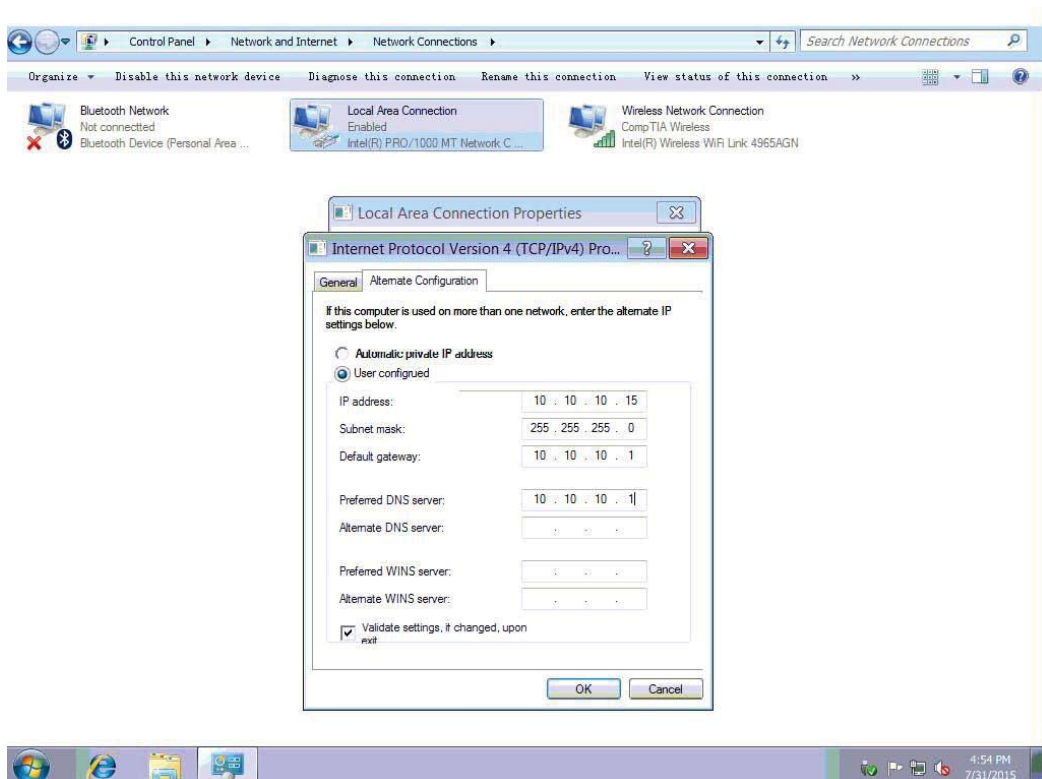

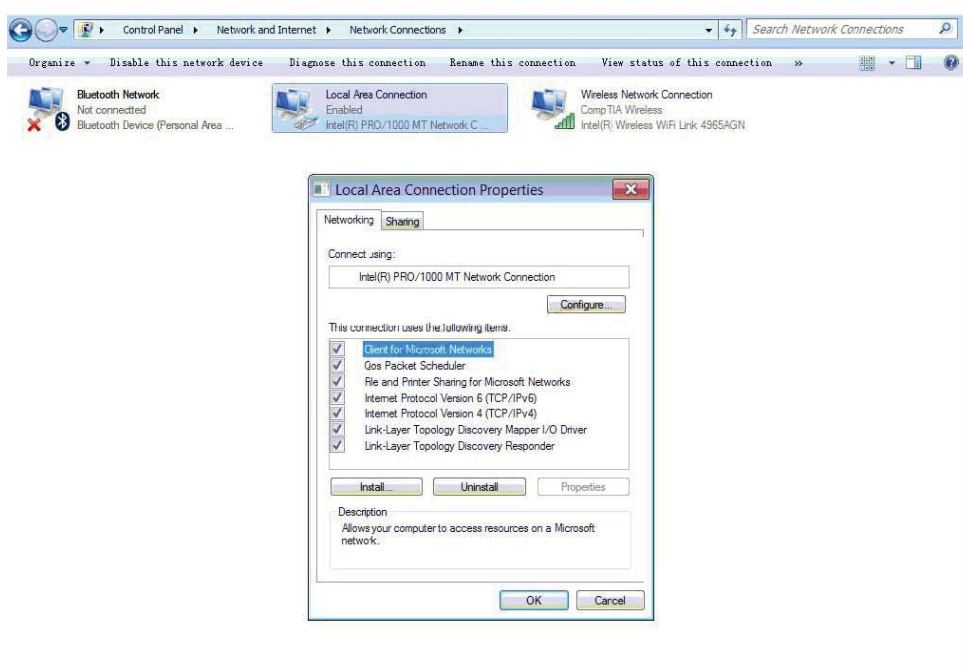

Additionally, the router's address is used as the primary DNS server and WINS is not in use. Please configure the laptop with an IP address of 10.10.10.15, ensuring that the laptop will still work when plugged into the switch at the office, which is configured for DHCP. Do not make any other unnecessary configurations to the laptop.

Instructions: Keyboard shortcuts are not available. When you have completed the simulation, please select the done button to submit your answer.

**Answer:**  
Exhibit

## QUESTION: 340

A user has installed two new drives in one of the computers in the computer lab and has

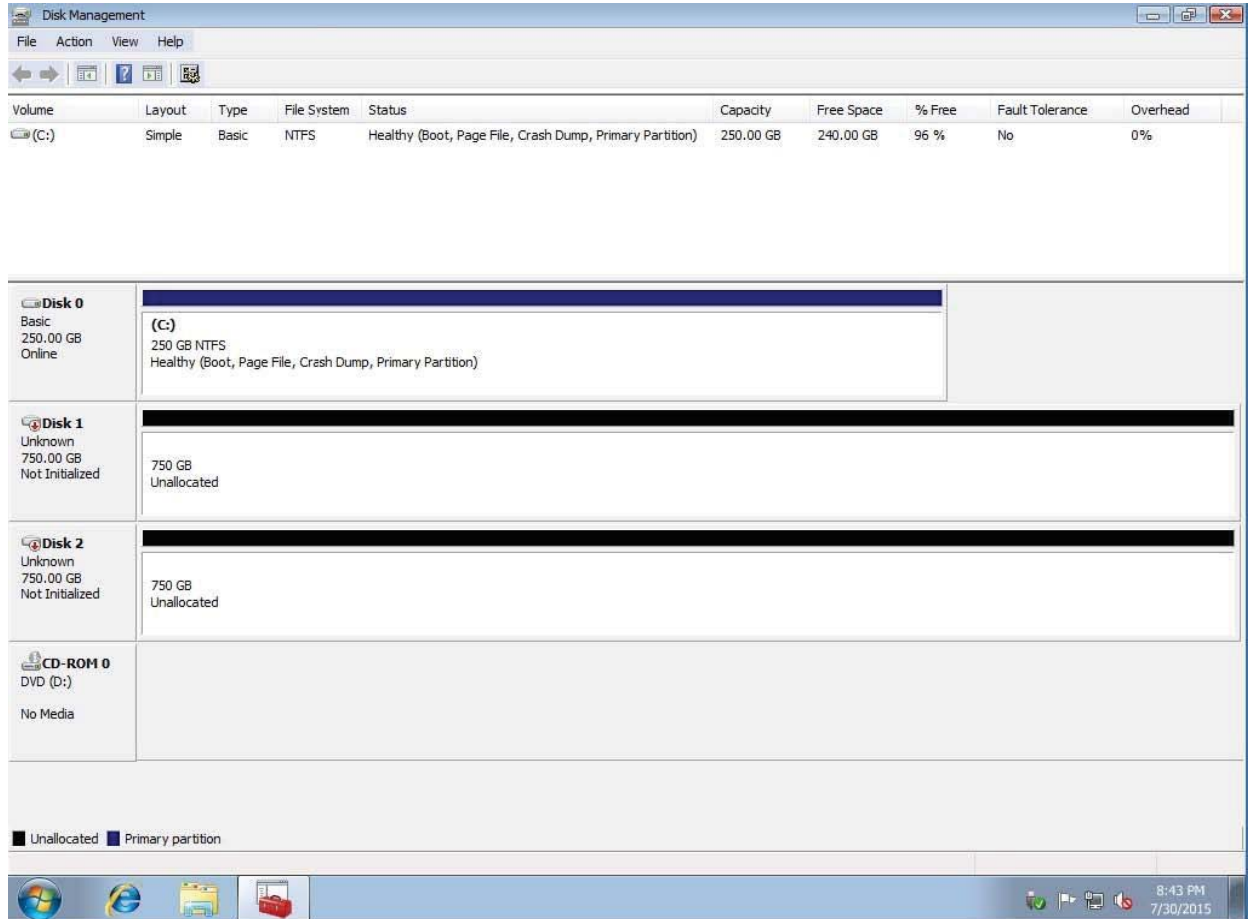

been unable to format Disk1 from the command prompt.

The lab requires that Disk1 be a dynamic disk configured with two partitions. The first partition must be 256,000 MB in size and mapped to drive F. The second partition must be 512,000 MB in size and mapped to drive G.

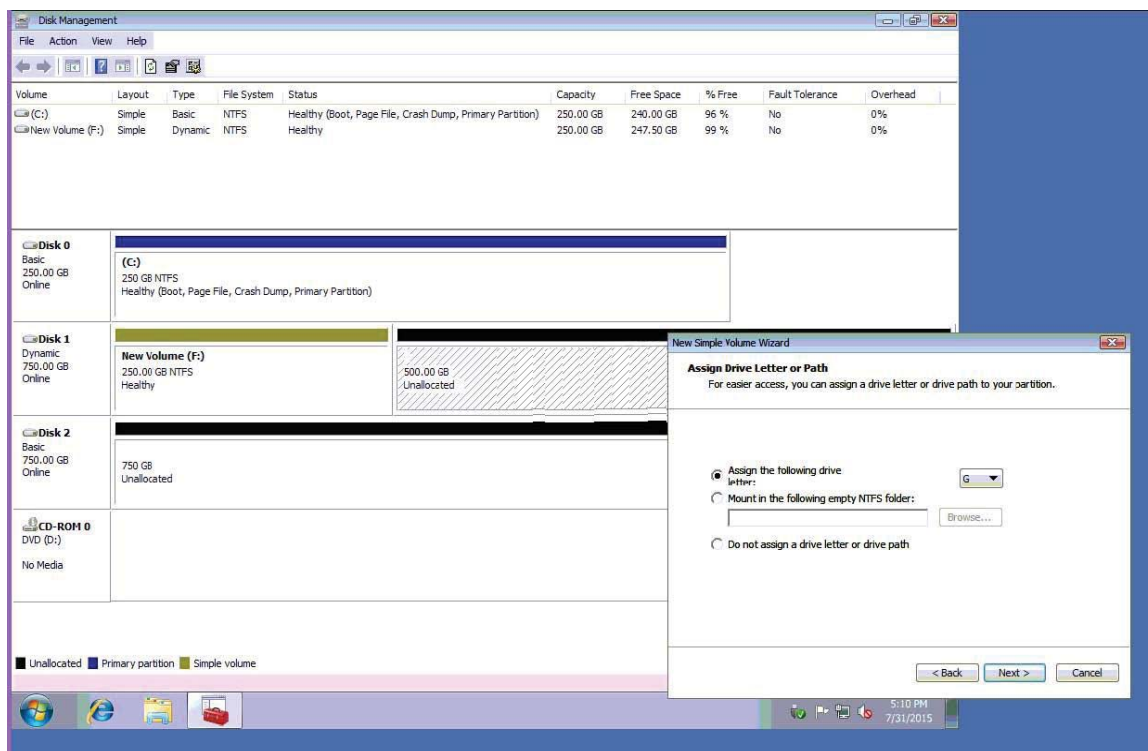

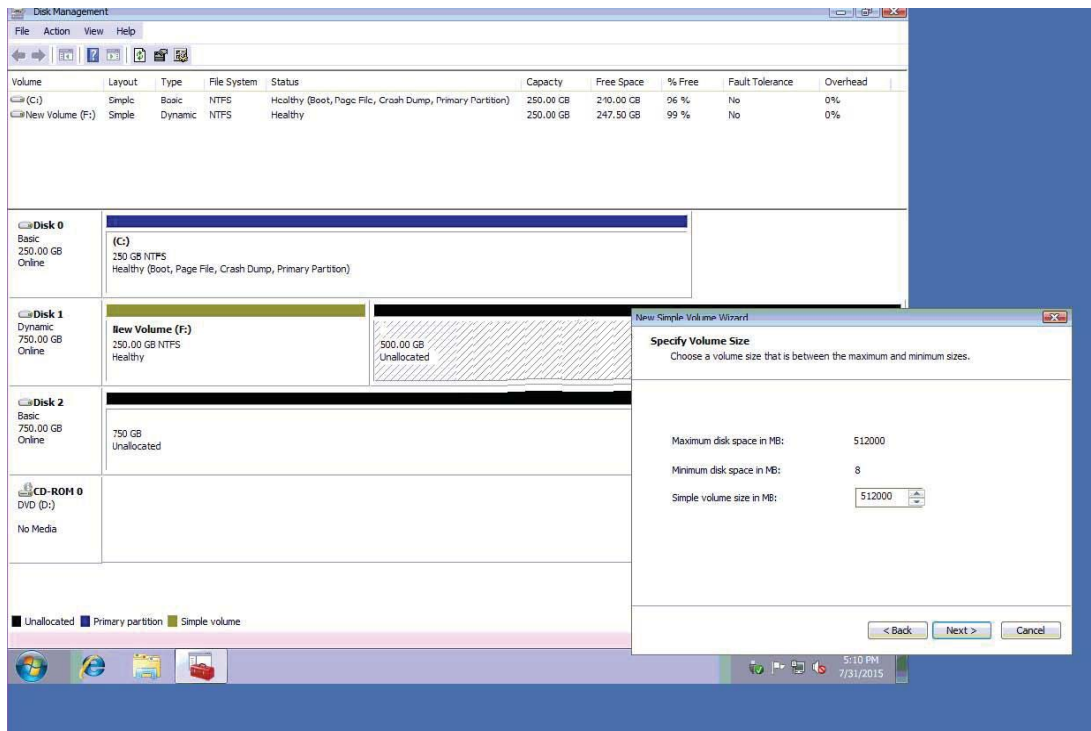

The new partitions must be formatted to ensure that users' files can be secured from other users and that the disk must be configured to account for future redundancy.

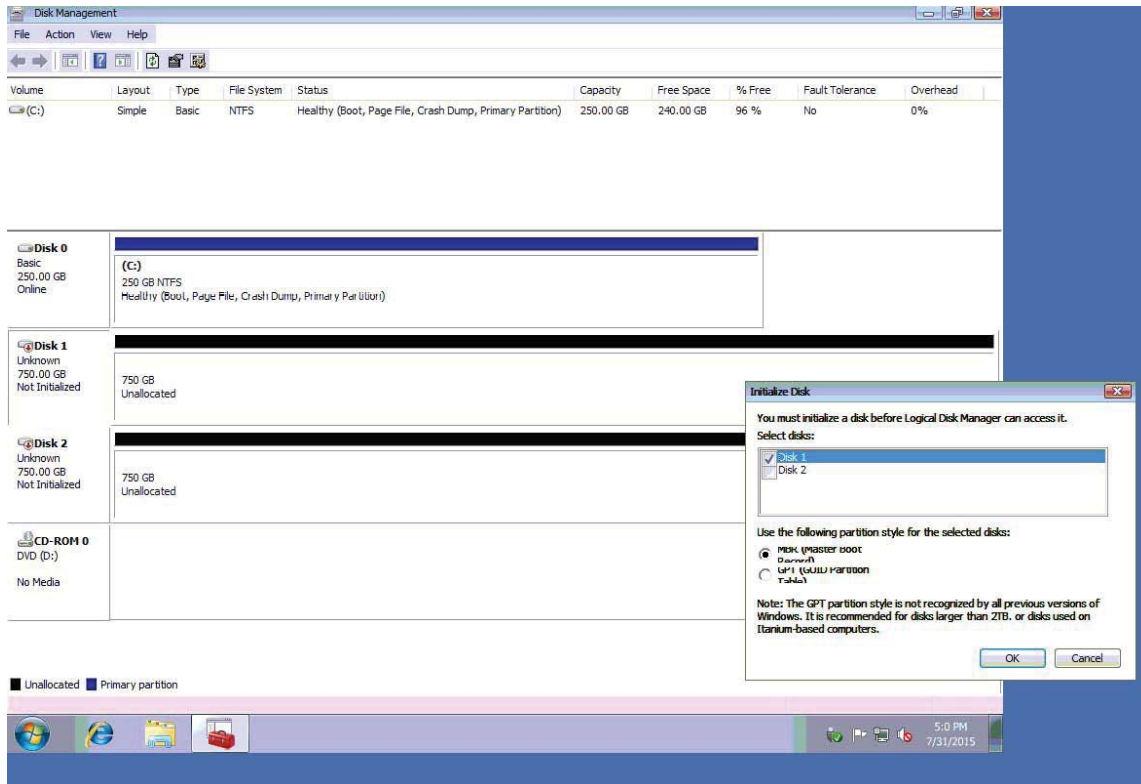

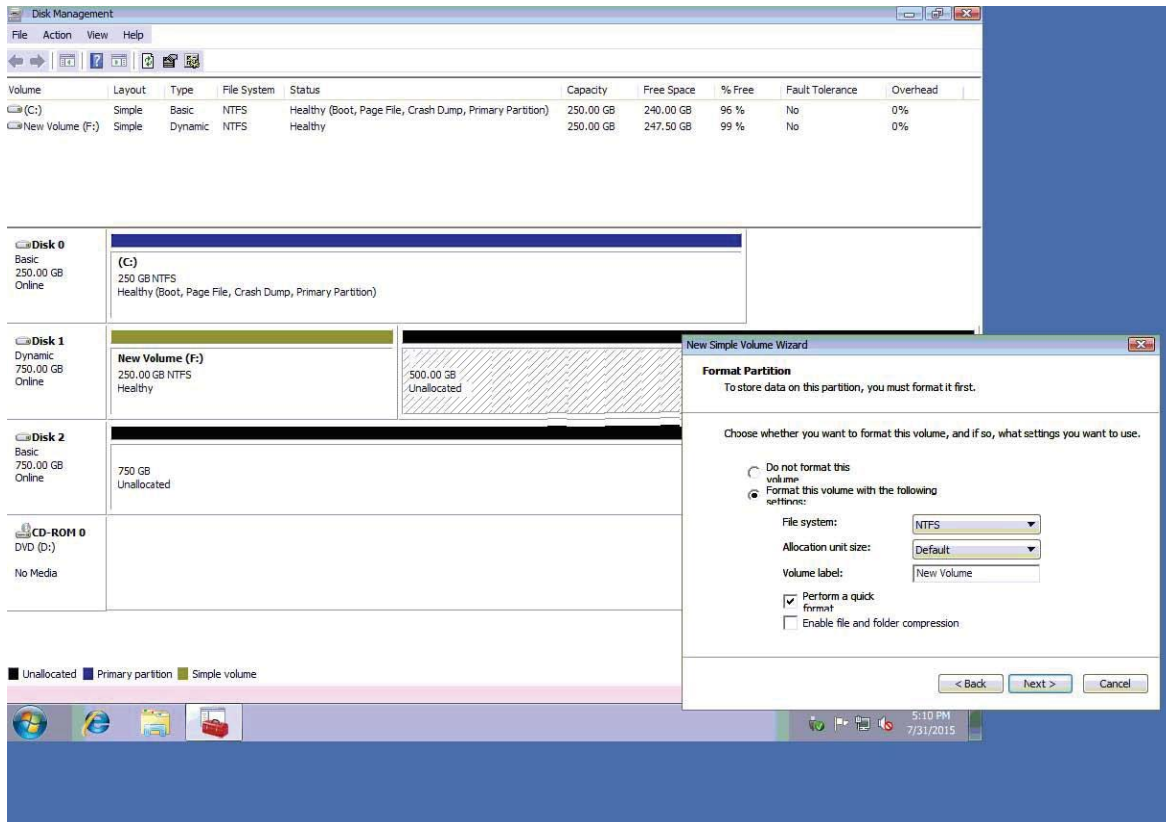

Instructions: Conduct the necessary steps within the Disk Manager to accomplish these tasks. When you have completed the simulation, please select the Done button to submit.

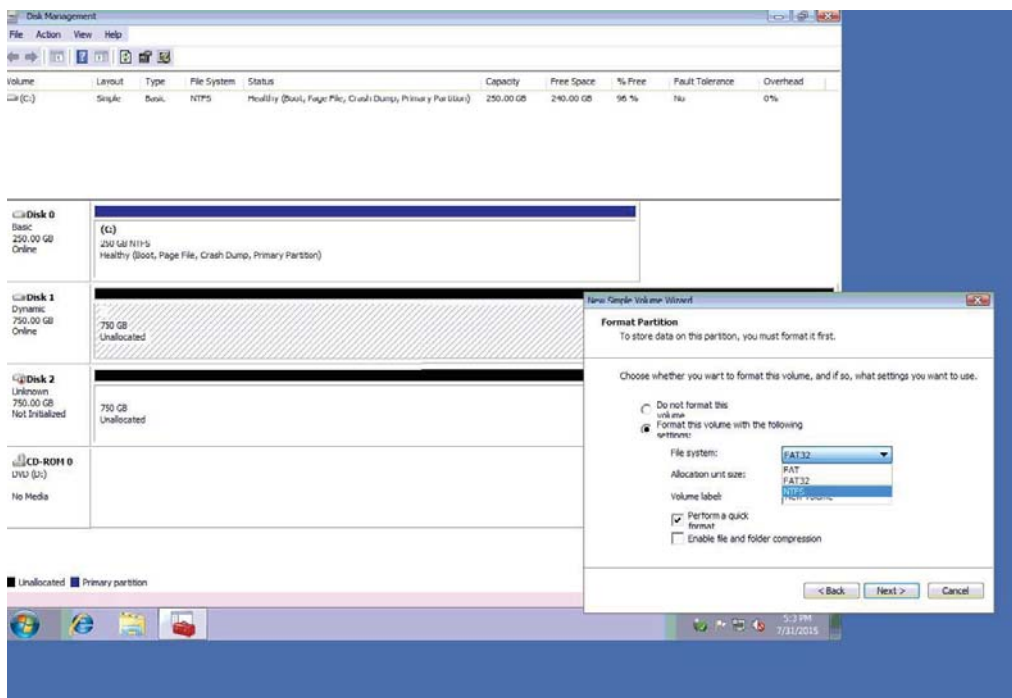

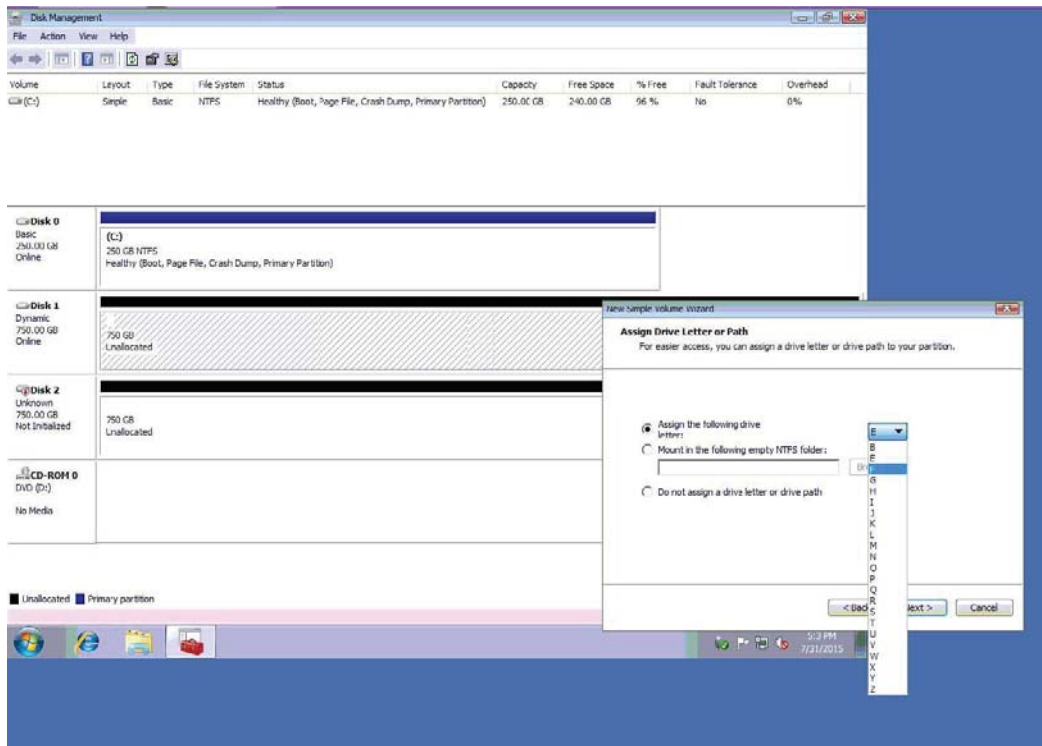

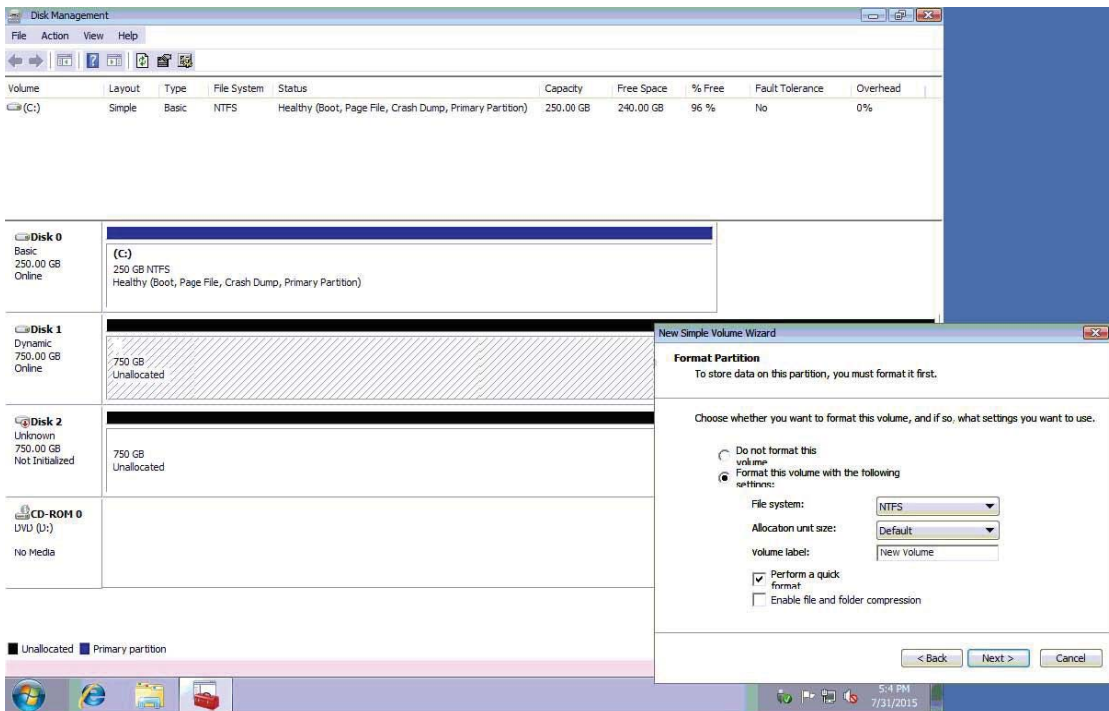

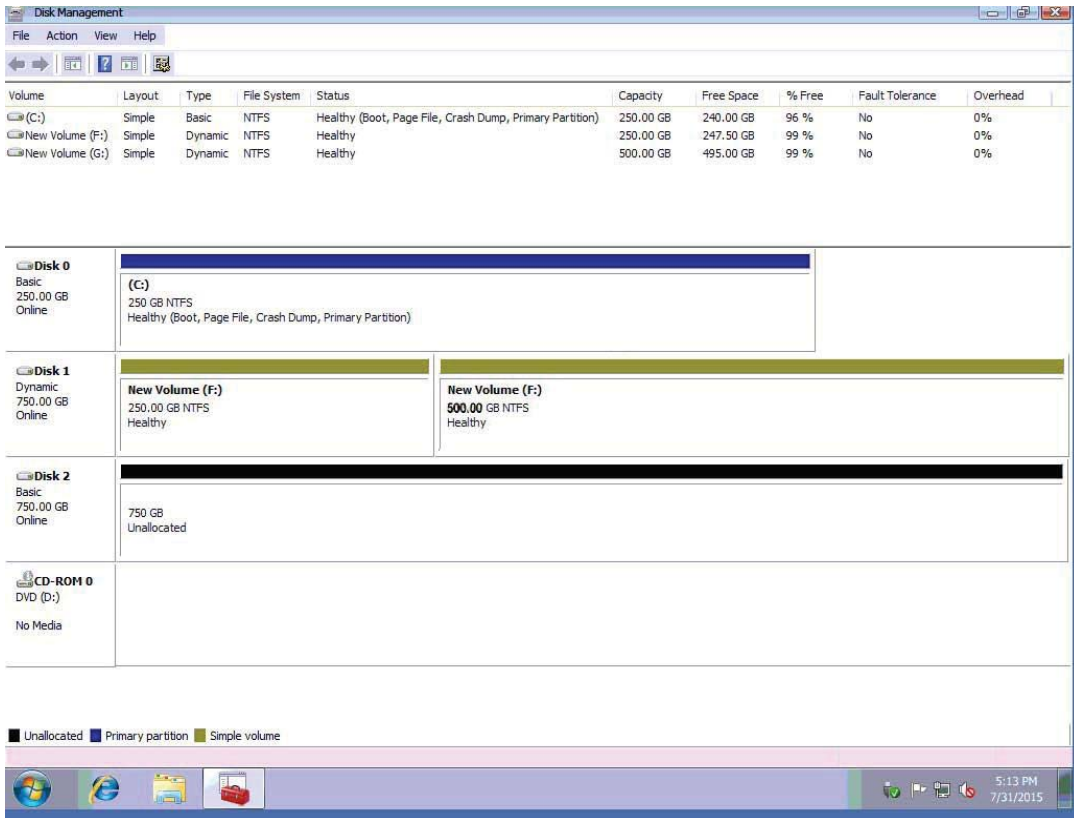

**Answer:**

Here are the screen shots showing this process:

**QUESTION: 341**

The network administrator has changed the IP address of ComputerA from 192.168.1.20 to 10.10.10.20 and now Jane, a user, is unable to connect to file shares on ComputerA from ComputerB using the computer name.

Instructions:

Using the available tools, resolve the connectivity issues. When you have completed the simulation, please select the done button to submit your answer.

**Answer:**

Need to flush the DNS cache on Computer B:

### QUESTION: 342

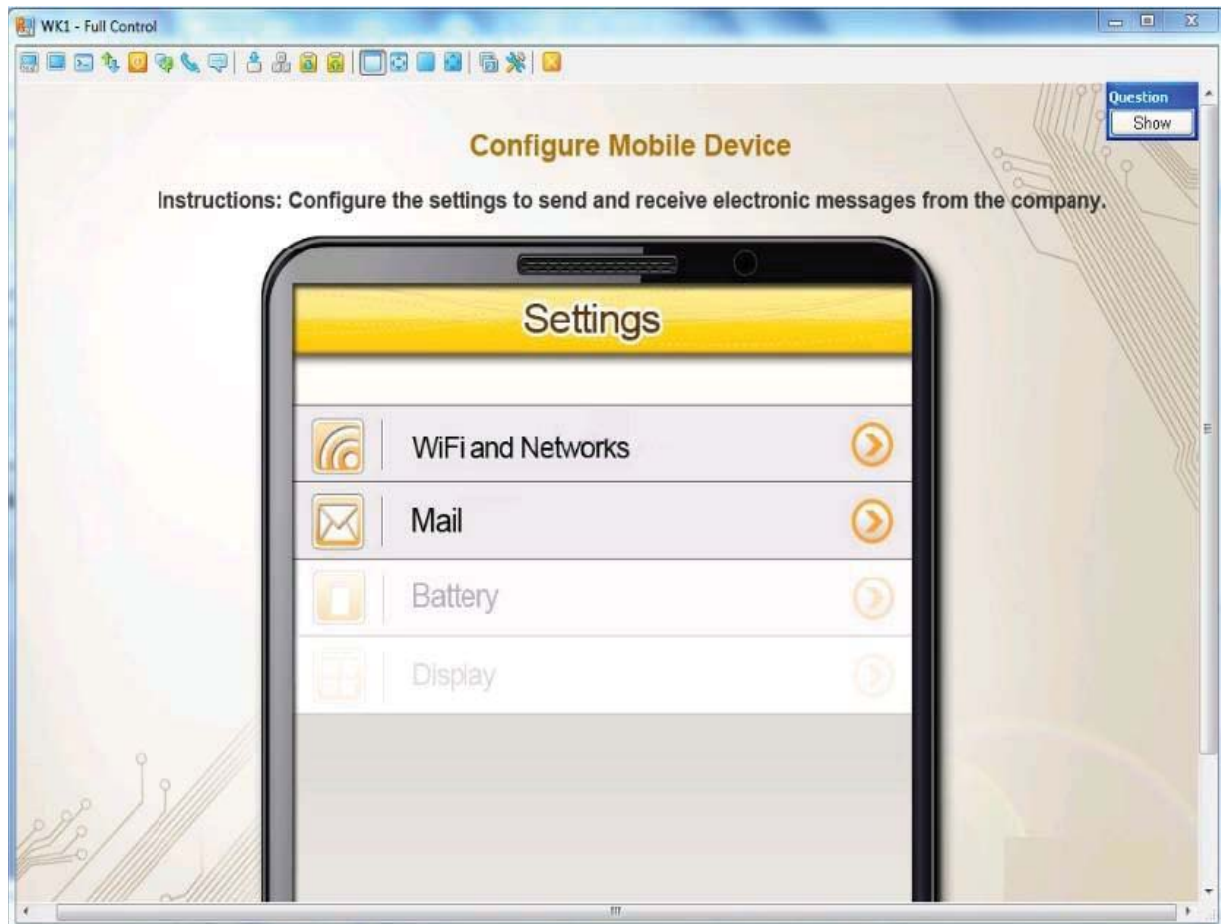

You need to configure your mobile device to send and receive electronic messages from your company. Your mobile device must be able to truly synchronize the message state with your desktop, so that when a message is read on your desktop, it is marked as read on your mobile device. These are the proper parameters:

- Email address: [tech@techies.com](mailto:tech@techies.com)
- Password: P@\$w0rd
- Pop.techies.com Port: 110 Security: None
- IMAP.techies.com Port: 993 Security: SSL
- smtp.techies.com Port: 465 Security: TLS
- Company SSID: Techies
- Security: WPA2
- Passphrase: P@\$w0rd
- SSID is not broadcasted

Instructions: You are not authorized to use the Company's WLAN. The outgoing server does not require login credentials. When you have completed the simulation, please select the

done button to submit your answer.

## Configure Mobile Device

Instructions: Configure the settings to send and receive electronic messages from the company.

Back WiFi and Networks Save

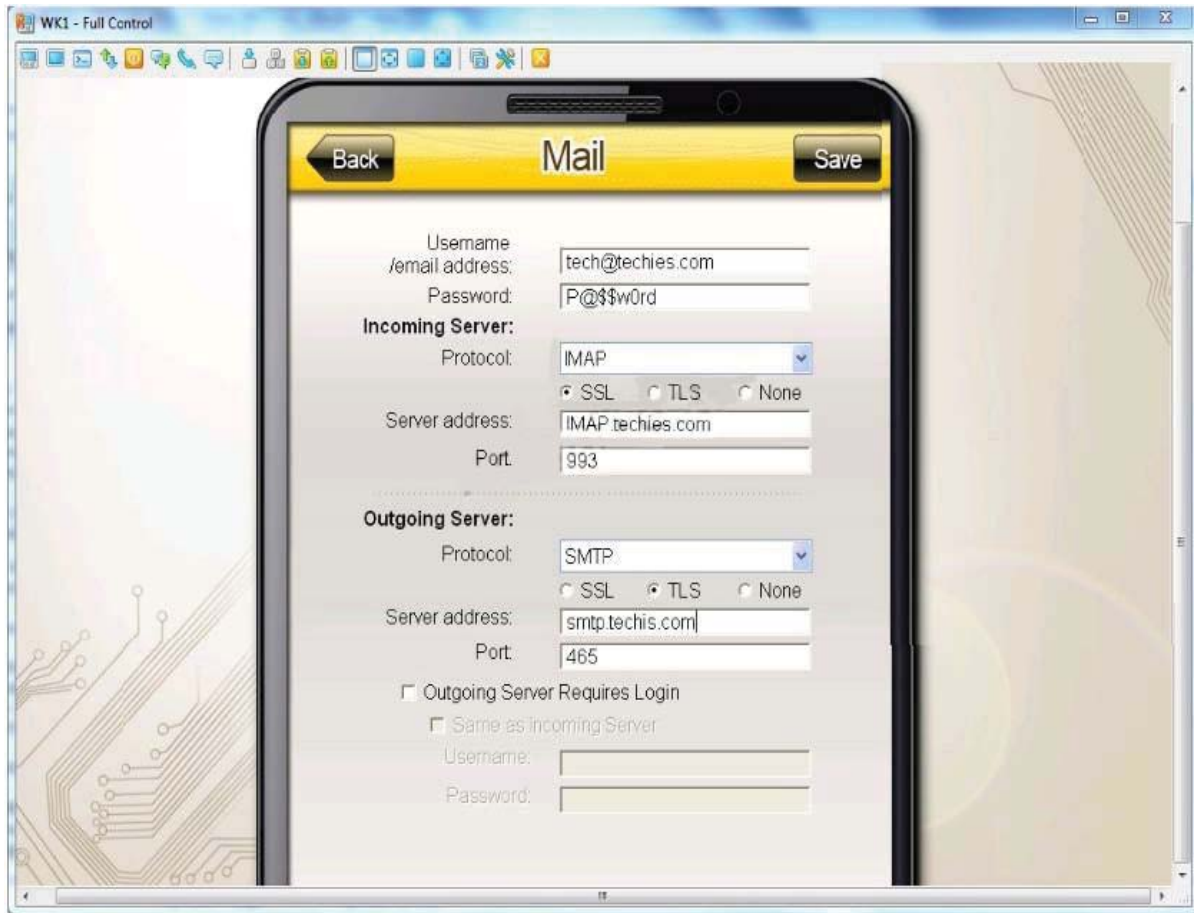

802.11 b/g Radio: ☐ Enabled  
☒ Disabled

SSID:

Security:

Passphrase:

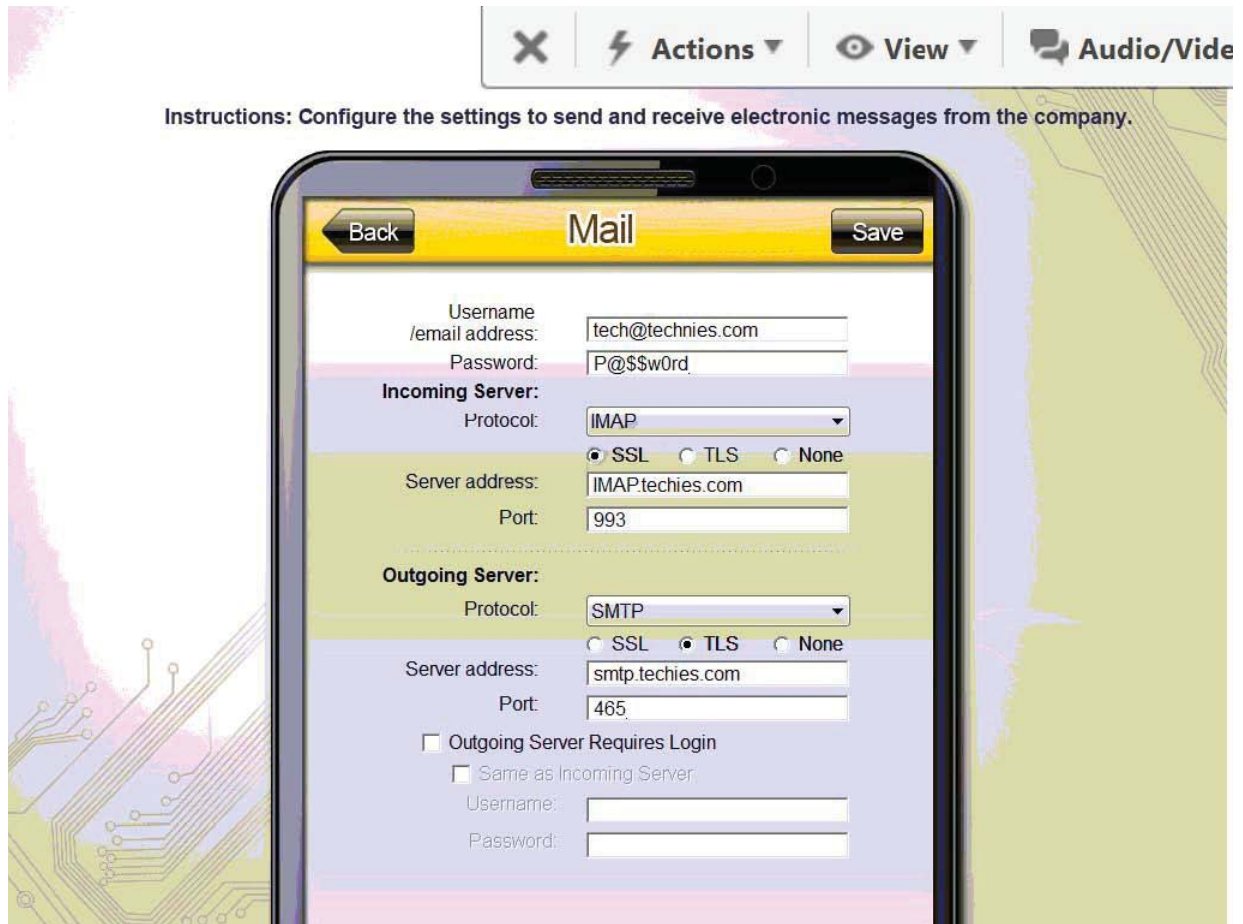

☐ Connect to hidden network

**Answer:**

Since we are instructed to not use the company's WLAN we only need to worry about the email settings and ignore the WiFi and Networks tab.

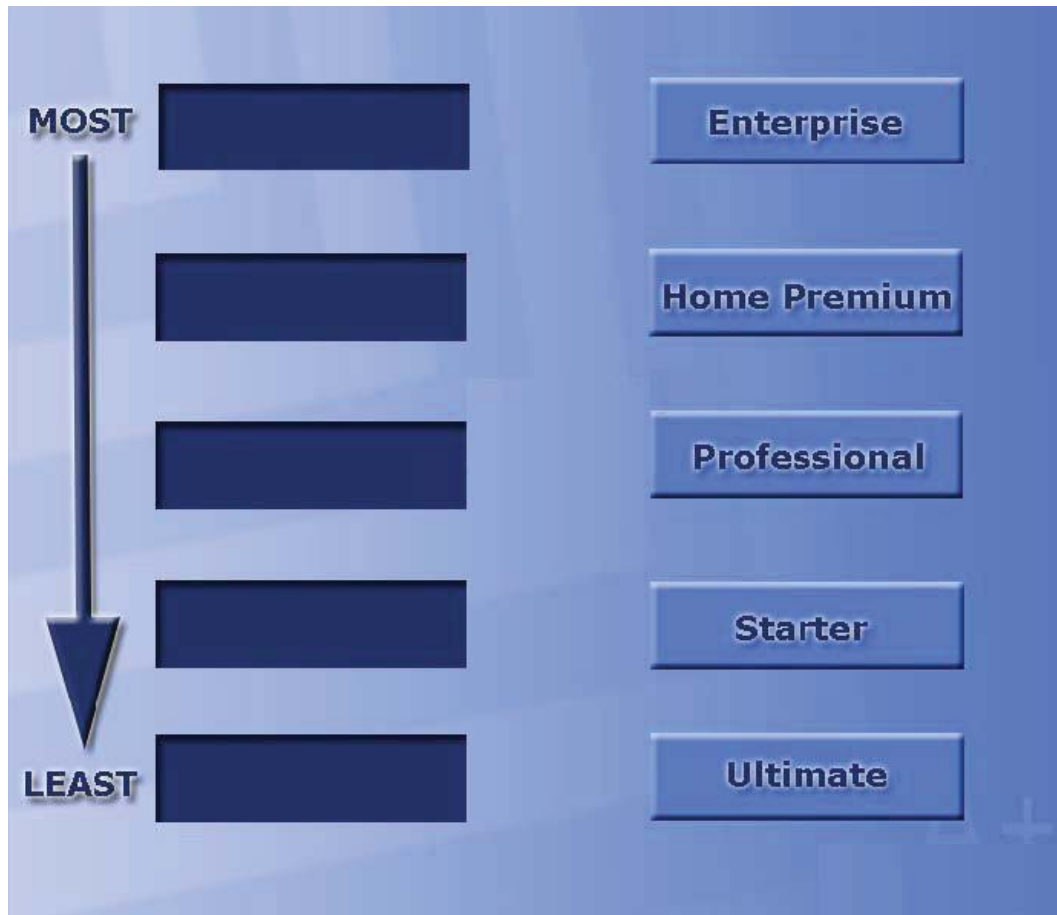

On the MAIL tab enter information as shown below:

That should be all that is needed.

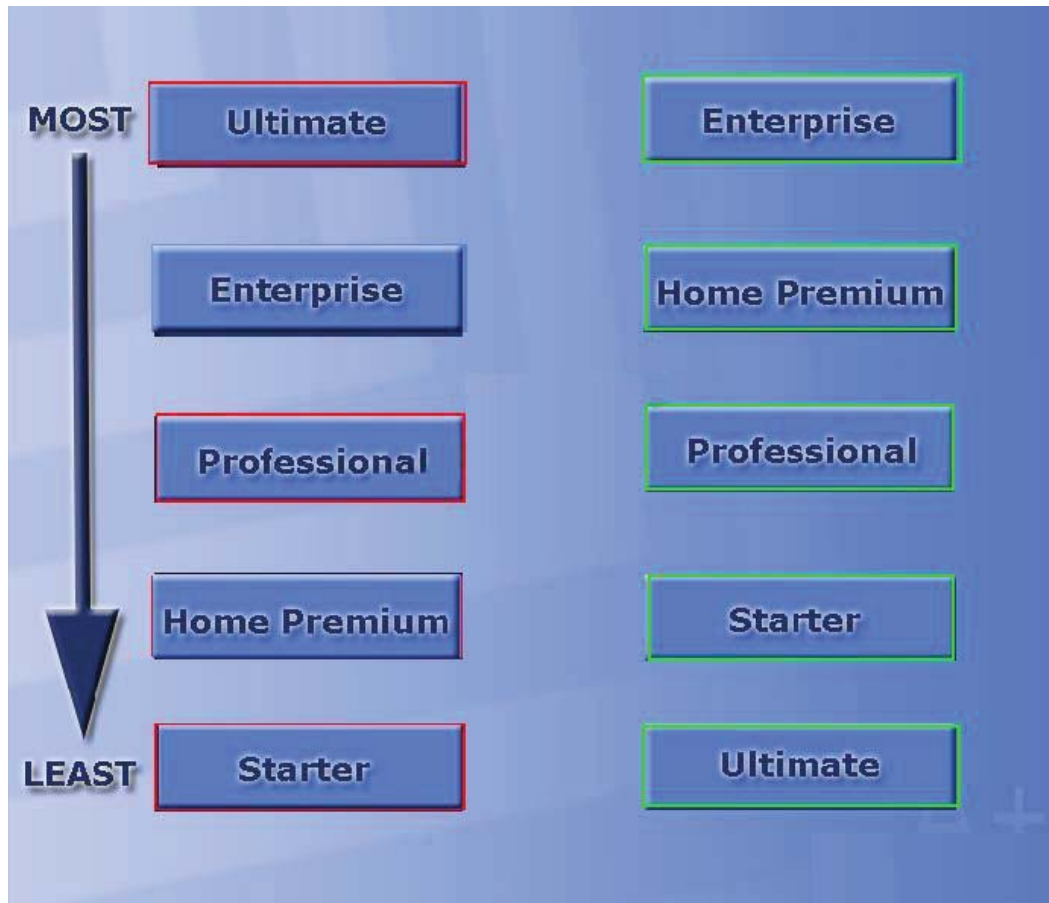

**QUESTION: 343**
